## **Case Example**

Information provided from school-based referral:

- 12-year old, Latino boy, in 7<sup>th</sup> grade
- Referred by school teacher due to significant absences, learning difficulties, and socially withdrawn
- Mother reports that son complains of stomach pains, difficulty breathing, and tantrums when forced to attend school
- Father repeatedly has to leave work to take son to Primary Care Physician due to bodily complaints, and believes son is faking it to get out of school

**How would you go about assessing what's going on? How would you integrate how culture may be impacting the family's presentation?**
