Evangeline Artates
CNSA ADVISOR & FACULTY
NURSING SIMULATION EDUCATION

Mary Juliano
FACULTY, NURSING
SIMULATION EDUCATION

Objectives

- To comprehend affective learning strategies for improvement of students' and educators' affective behavior
- To enumerate different learning strategies that may significantly influence behavior changes
- To explore these learning strategies that can directly improve patient care in the clinical setting

Affective Domain

Krathwohl, D.R., Bloom, B.S., Masia, B.B. (1973). Taxonomy of Educational Objectives, the Classification of Educational Goals. Handbook II: Affective Domain. New York: David McKay Co., Inc.

... "to advance the transition of the student to professional nurse through leadership development, education, mentorship, advocacy, activism, and stewardship..."

Empathy is . . .

“... a complex multi-dimensional concept that has moral, cognitive, emotive, and behavioral component.”

Mercer, S. W., & Reynolds, W. J. (2002). Empathy and quality of care. The British Journal of General Practice, 52(Suppl), S9–12.

Clinical Empathy . . .

“involves the ability to:

- understand the patient’s situation, perspective, and feelings (and their attached meanings)
- to communicate that understanding with the patient in a helpful (therapeutic) way.”

Mercer, S. W., & Reynolds, W. J. (2002). Empathy and quality of care. *The British Journal of General Practice*, 52(Suppl), S9–12.

Empathy is walking a mile in
somebody else's moccasins.
Sympathy is being sorry their feet
hurt.

- Rebecca O'Donnell
